

T R A V E L S

The one who is setting high goals in his life knows that he can grow only if he will do the things he afraid the most.

We operate from the state that our fears are not our limitations, but our points of growth. Comfort zone is our main limitation; while expanding it — we expand our opportunities.

Every limitation has its benefits and its price. For how long you are still ready to pay this price? And do you still receiving a benefit from it?

During the solution of our economic problems we absolutely forgot that we were born as a unique creatures, enlightened, capable to love, to empathize and to create, and our main goal is

## TO REALIZE OUR POTENTIAL IN THIS WORLD FULLY.

The great disease of our century called a "loss of soul". The neglected soul does not disappear — it is shown asymptomatically in obsessions, addictions and dreams.

Therefore the one who did not lost his ability to dream will tend to become a happy person. His subconscious in case of reaching its freedom will celebrate its revival by bringing out and showing to the world the most beautiful symbols possible.

We are here to help you. Journeys — are just our drawing tool on this canvas.
